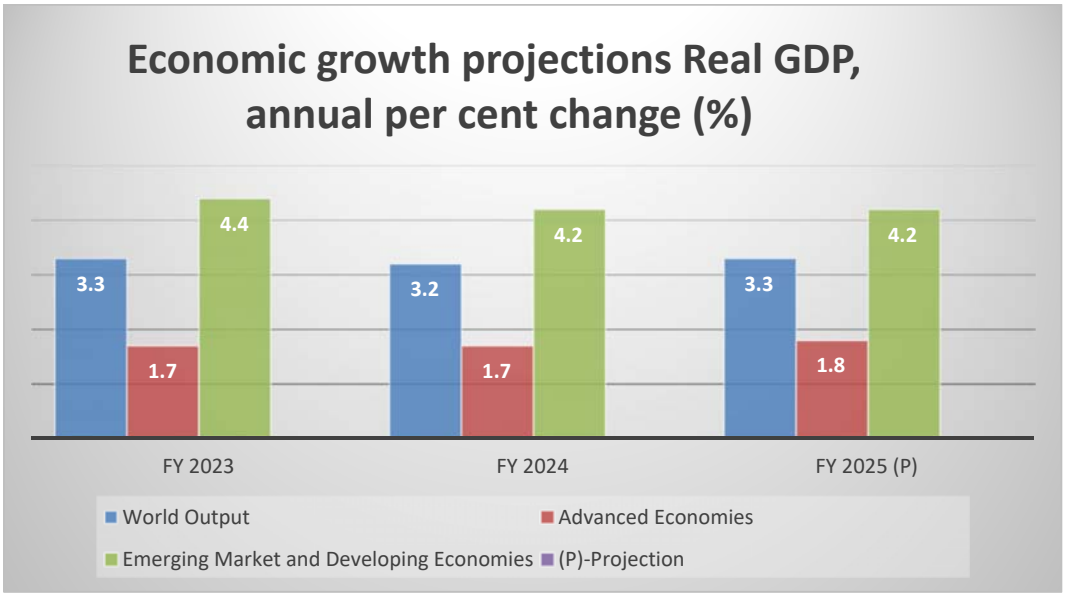
I. ECONOMIC OVERVIEW

Global Economy

The global economy displayed adaptability and resilience in 2024, maintaining steady growth despite a multitude of challenges. According to the International Monetary Fund (IMF), global GDP growth stood at 3.2% in 2024, supported by stable consumer demand and targeted fiscal interventions. Advanced economies experienced a modest growth of 1.7%, while emerging markets and developing economies (EMDEs) continued to grow at a pace of 4.2%, highlighting regional disparities in economic performance.

Global inflation, although easing, persisted at elevated levels, reaching 5.9% in 2024. The tightening monetary policies of central banks in major economies have helped rein in inflationary pressures, though fiscal prudence remains critical to sustain long-term stability. Geopolitical uncertainties, including the continued Russia-Ukraine conflict and tensions in the Middle East, have disrupted global trade flows and intensified supply chain bottlenecks. Though in 2025, there are signs of easing tensions in the Middle East, as Israel and Hamas have reached a temporary ceasefire, paving the way for diplomatic engagement and regional stability. This development could alleviate logistical disruptions, lower oil prices, and ease trade constraints, providing a much-needed boost to global supply chains and energy-dependent economies.



Outlook

The global economic outlook for 2025 signals a phase of measured growth. The IMF projects global GDP to expand by 3.3% between 2025 and 2026, supported by easing inflationary pressures and sustained demand in emerging markets. However, the global recovery remains subject to key risks, including geopolitical uncertainties, mounting debt levels in advanced economies, and climate-induced disruptions to agriculture. Policymakers worldwide face the challenge of balancing economic growth with financial stability. Advanced economies are likely to grapple with the ongoing effects of high inflation and tighter monetary policies, while emerging markets stand to gain from increasing economic diversification and demographic advantages. digital Emerging opportunities lie in the accelerating adoption of technologies, advancements in green energy solutions, and the revival of global travel and tourism. Nevertheless, persistent challenges, such as fiscal vulnerabilities and supply chain constraints, underscore the need for strategic preparedness and coordinated action.

The members of the

1.2 Basis of preparation

• Compliance with Ind AS

The financial statements comply in all material aspects with Indian Accounting Standards (Ind AS) notified under Section 133 of the Companies Act, 2013 (the Act) [Companies (Indian Accounting Standards) Rules, 2015] and other relevant provisions of the Act.

The financial statements up to year ended March 31, 2016 were prepared in accordance with the accounting standards notified under Companies (Accounting Standards) Rules, 2006 (as amended) and other relevant provisions of the Act.

• Historical cost convention

The financial statements have been prepared on a historical cost basis, except for the following:

• certain financial assets and liabilities which have been measured at fair value;
• assets held for sale — measured at lower of carrying value or fair value less cost to sell; and
• defined benefit plans — plan assets measured at fair value
• The company has incurred net losses during the year and preceding years. The company has separated all employees from October 2016 onwards, after the company lost all the major contracts for provision of services. The company's management is making efforts to get new contracts based on their past experience to recommence the operations. As on date, it is highly contingent that the company will be able to discharge its assets or liabilities in normal course of business. Hence, there remains a significant doubt in the company's ability to continue as a going concern. No adjustments to this effect has been done in financial statements.

• Segment Reporting

The Company is engaged primarily providing all kinds of business support services. However, in the context of Indian Accounting Standard 108 – Operating Segments, these are considered to constitute single reportable segment. Accordingly, no separate disclosure for primary or secondary segments is given.

• Revenue Recognition

The Company recognizes revenue when the amount of revenue can be reliably measured, it is probable that future economic benefits will flow to the entity and specific criteria have been met for each of the Company's activities as described below. The Company bases its estimates on historical results, taking into consideration the type of customer, the type of transaction and the specifics of each arrangement.

Recognising revenue from major business activities:
Revenue from sale of services is recognized on transfer of all the significant risk and rewards of ownership to the recipient of services.
Revenue in respect of interest on fixed deposit with banks is recognized on accrual basis at the rate at which such entitlement accrue.

• Property, plant and equipment

Freehold land is carried at historical cost. All other items of property, plant and equipment are stated at historical cost less depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the items. Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognized when replaced. All other repairs and maintenance are charged to profit or loss during the reporting period in which they are incurred.
Transition to Ind AS
On transition to Ind AS, the Company has elected to continue with the carrying value of all of its property, plant and equipment recognized as at April 1, 2016 measured as per the previous GAAP and use that carrying value as the deemed cost of the property, plant and equipment.

Depreciation methods, estimated useful lives and residual value
The useful lives of property, plant and equipment are depreciated on pro-rata basis on the Written-Down Value method over the estimated useful lives of the assets prescribed in Schedule II to the Companies Act, 2013, which are as follows:

Assets Useful Life
Office Equipment 05 Years
Vehicles 08 Years
Computer 03 Years
The same represent the consumption pattern and is based on technical evaluation done by management. The residual values are not more than 5% of the original cost of the asset. The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period. An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.
Gains and losses on disposals are determined by comparing the proceeds with the carrying amount and are recognized within 'Other (losses)/gains' in the statement of profit or loss.

• Intangible Assets

Transition to Ind AS
On transition to Ind AS, the Company has elected to continue with the carrying value of all of its intangible assets recognized as at April 1, 2016 measured as per the previous GAAP and use that carrying value as the deemed cost of the intangible assets. Further the company has not any record or other documentary evidence to verify the existence of its Intangible asset namely Technical know-how as well as its carrying value on reporting date.

• Impairment of assets

Intangible assets that have an indefinite useful life are not subject to amortisation and are tested annually for impairment, or more frequently if events or changes in circumstances indicate that they might be impaired.

Other assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An

impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash in□ows which are largely independent of the cash in□ows from other assets or groups of assets (cashgenerating units). Non-financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at the end of each reporting period.

Further, the company has not amortized its intangible asset namely Technical know how.

Diluted earnings per share adjusts the figures used in the determination of basic earnings per share to take into account the after income tax effect of interest and other financing costs associated with dilutive potential equity shares and the weighted average number of additional equity shares that would have been outstanding assuming the conversion of all dilutive potential equity shares.
